

Use feedback from your people to develop leaders and drive success.

Simple assessments for employees.
Fast guidance for executives.
Actionable coaching for managers.

EMPLIFY CONTINUES WHERE OTHERS STOP.

We're not a survey platform. We're not consultants. We're that and more. Our unique combination of Methodology + Technology + Services helps you find out what's really going on with your people and create the change your business needs to move forward. We don't just hand you a bunch of survey results

and send you on your way. We pair you with a People Insights Consultant — a trusted advisor who guides you along your journey. Your consultant provides you and the broader executive team with thought partnership, clear guidance, and 3rd party perspective on org-wide wins and risks in the assessment results.

OUR CUSTOMERS VALUE THE DATA AND DELIVERY.

“ Engagement product that's actually helping us understand our employees!

This product is very easy to roll out and the information it pulls in is very specific and valuable. But to me, the real value is our Emplify partner who walks us through the results, helps us understand what our employees are saying, and gives us recommendations.

WITH EMPLIFY, YOU GET THE DATA YOU NEED FOR THE CHANGE YOU WANT.

OUR METHODOLOGY IS PROVEN

Everything we do is bound by a methodology that drives Employee Engagement, Organizational Change, and Individual Growth.

We started Emplify because the alternatives were leaving strategic people leaders hanging. Tech-friendly surveys are simple and fast, but they create survey exhaustion and don't drive change on their own. Consultants-for-hire are credible and can provide expert guidance, but their methods are pricey and their advice often comes months too late. Our methodology is designed to bring the best of technology and consulting under one roof.

ENGAGEMENT ASSESSMENT

Our standardized survey quantifies employee engagement levels and measures the presence of 17 underlying factors that drive engagement. The Engagement Assessment is statistically reliable, routinely validated by Ph.D. experts, and takes 7 minutes for employees to complete.

DYNAMIC FEEDBACK

Using AI technology, employees' quantitative results are calculated within seconds of completing the Engagement Assessment and they are immediately prompted with a follow up question on a key topic.

PEOPLE INSIGHTS CONSULTANTS & COACHES

Our team is dedicated to helping you succeed. Unlike typical software support, our Services team will become deeply familiar with your organization and goals. Consultants will provide you and the broader executive team with thought partnership, clear guidance, and 3rd party perspective. Coaches will help your managers with their teams' assessment results, as well as through ongoing, one-on-one leadership training.
